COMPLIMENTS OF

ANDREW J. KAVANAUGH
Chief of Police
ROCHESTER, NEW YORK

January 1, 1930

Mr. Curtis W. Barker
Director of Police

Sir: I have the honor to submit herewith the thirtieth annual report of this Bureau for the year ending December 31, 1929.

The reports contained herein were compiled by the Police Division of Records. They do not conform entirely to the standard for annual reports, as outlined by the Committee on Uniform Crime Records of the International Association of Chiefs of Police, but steps have been taken to have future reports prepared so that they coincide with them.

A superlative degree of efficiency was maintained in the Bureau throughout the year.

In transmitting this report, the following recommendations are made for your consideration:

That a study of police radio service in several principal cities be made with a view to placing into effect in Rochester such a service, whereby all police automobiles would be equipped with radio apparatus. This, in my opinion, would create a greater degree of efficiency; because each prowler car could be assigned to cruise in a specified zone and would be able to pick up a message of a complaint in that particular zone. Thus arriving at the scene of the complaint at the earliest possible moment. This would also release the two machines, now held on reserve at Precincts, for patrol duty.

That a study be made of the efficiency and results obtained by the Teletype System of communication which is now in use in other cities with the idea of installing such a system in Rochester. By the use of the Teletype we would be able to create a central bureau of complaints and thus eliminate at least half of the office force now employed in the various Precincts.

That cell rooms at stations 3, 5 and 6 be discontinued and the portion of the building in which the cell rooms are located be remodeled for housing automotive equipment attached to such precincts. Further, that a suitable garage be erected in connection with Precinct 2, and that accommodations for automobiles connected with Precinct 4 be enlarged to house all cars assigned to that precinct. Also, that a survey be made of the garage connected with police headquarters, with the idea of remodeling it to afford more spacious quarters so that all police automobiles may be housed.

That a female stenographer be employed for assignment to the Women's Bureau for use of Policewomen in preparing cases and for performance of work in that office.

That a stenographer be employed for assignment to the Licens Bureau.

That twenty-five members be appointed to the Police Bureau each year until the personnel of the Department reaches a quota of two per thousand, which is the minimum in other cities.

I desire to assure you that the co-operation received from your office in the past has been appreciated.

Respectfully yours,

ANDREW J. KAVANAUGH

Chief of Police

OF THE CITY OF ROCHESTER

MURDERS

On August 15, 1929, at about 7:55 P. M. Alfio Balsamo, 727 Clinton Avenue South was shot and killed by Sante Cimino, at 264 Averill Avenue. Cimino was arrested by Detectives Lindner, Lambiasi, Fox and Kavanaugh, and later committed to the Matteawan Asylum for Criminal Insane.

On April 8, 1929, at 8:05 P. M. an unknown man called at the home of Nicholas Tiara, 33 Locust Street, requesting that he accompany him to a new house under construction at 563 Mt. Reed Blvd., to give estimates on a tile job. When entering the house at that address the man shot and killed Tiara. Several persons, including the wife of Tiara, were arrested as material witnesses, but the case never cleared up; motive unknown.

On November 20, at 6:15 P. M. Harry Leonard, residing with his brother-in-law, Kelly Hagerman, at 112 Maryland Street. Hagerman had been quarreling with his wife and Leonard, annoyed by the abuse, shot and killed Hagerman. Leonard fled the scene of the crime and later returned and was arrested by Officer Quetchenback, who was stationed in the home. Grand Jury failed to find a bill against Leonard.

BURGLARIES

There were 551 cases of burglary reported in 1929 as compared with 684 in 1928, showing a decrease of 133.

Practically all of the cases of burglaries were committed by persons who reside in the city and who were evidently not professionals.

Burglaries classified as to value of property stolen:

\$.20 to \$ 1.00.....	16
1.01 to 10.00.....	119

DIVISION OF IDENTIFICATION

The Division of Identification has charge of the measuring, photographing and fingerprinting of prisoners. Copies of all records made are furnished the National and State Bureaus of Identification where use of the same is made by practically all police agencies of the country in determining previous records of persons that they may have arrested. The high degree of efficiency which this bureau has attained is due in a great measure to the research experts of the Eastman Kodak Company who have co-operated to the fullest extent by rendering their services with the use of the latest photographic equipment. Photographs and fingerprints of all taxicab drivers operating in the city are taken, and are on file in this section. This bureau also takes photographs of murder scenes as well as the scenes of serious accidents.

LICENSE AND SANITATION DIVISIONS

These two bureaus are combined under one head. The License Bureau has charge of enforcing the issuance of all licenses and permits issued by the Mayor and Commissioner of Public Safety, as well as investigate all complaints from various Social Agencies, the Chamber of Commerce and the Better Business Bureau in regard to licensed occupations of the City.

The Sanitary Bureau co-operates and works in conjunction with the following Bureaus to investigate alleged violations covered by that particular bureau; The Smoke Bureau, The Health Bureau, The Corporation Counsel's Office, The City Planning Bureau, The Building Bureau and the Plumbing Bureau.

The License Bureau and the Bureau of Sanitation, coming under one head, has discarded the old system of book records and installed an up-to-date, modern card index system, which enables the Bureau to keep an accurate record of all licenses and complaints investigated. There is also kept by this Bureau a card index record of all Motor Cab operators. Such operators are interviewed and investigated by this Bureau before they receive their license. This system being effective since about July, 1928.

The following is a statement of licenses and permits issued for various occupations, also complaints and investigations, together with sanitary report for the same period.

Auctioneers	15

AUTO ACCIDENTS

Following is the report of auto accidents occurring from January 1, 1929 to January 1, 1930:

Number of accidents occurring at street intersections where standards are placed.....	43
Number of accidents occurring at street intersections where signal lights are operated.....	295
Number of accidents occurring at street intersections.....	1,841
Number of accidents occurring between intersections.....	1,675
 TOTAL	 3,854
Number of accidents occurring at street intersections where standards are placed, in which persons were injured.....	23
Number of accidents occurring at street intersections where signal lights are operated, in which persons were injured.....	195
Number of accidents occurring at street intersections in which persons were injured.....	1,109
Number of accidents occurring between intersections in which persons were injured.....	1,081
 TOTAL	 2,408
Persons injured at street intersections where standards are placed	38
Persons injured at street intersections where signal lights are operated	234
Persons injured at street intersections.....	1,450
Persons injured between intersections.....	1,204
 TOTAL	 2,926
Percentage of accidents occurring at street intersections where standards are placed.....	.011%
Percentage of accidents occurring at street intersections where signal lights are operated.....	.07654%
Percentage of accidents occurring at street intersections.....	.4776855%
Percentage of accidents occurring at street intersections in which persons were injured.....	.46%

Following is a report of auto accidents, from January 1, 1929 to January 1, 1930:

There were 1,446 auto accidents in which the damage was slight:

 732 at street intersections

 594 between intersections

 20 where standards are placed

 100 where signal lights are operated

There were 2,408 auto accidents in which persons were injured:

 1,109 at street intersections

 1,081 between intersections

 23 where standards are placed

 195 where signal lights are operated

Type of autos in which the damage was slight:

 1,301 pleasure cars

 20 light deliveries

RECORD DIVISION

This Division, organized March 1, 1928, receives a record of all complaints, arrests, ordinance violations, stolen or lost property, property recovered and missing persons. Pawn shops and second hand store reports are on file in this section, together with other statistics relating to the department. Statistical reports shown in this book have been compiled by this section, and are in conformity with the requirements of the New York State Department of Correction. This section also broadcasts daily through the courtesy of WHAM and WHEC, local radio stations, police matters in which the public may be interested or might be of help to the department, such as descriptions of hold-up men and of missing persons, as well as the descriptions of stolen automobiles and license numbers.

RESEARCH DIVISION

The Research Division, under the direction of a competent chemist has been in operation since January 1, 1929. With the valuable assistance of research experts of the Bausch & Lomb Optical Company and the co-operation of research professors of the University of Rochester, this Division has made notable development during this period. Through the application of ballistic tests, identification of guns and bullets is made, thereby solving crimes that might not otherwise be possible. Scientific tests of drugs, powders, hair, blood and other articles entering into criminal investigations are made by this section. Microscopic photographs of evidence are made for use in the prosecution of cases.

POLICE SCHOOL

A police training school, as sponsored by the Conference of Mayors and Municipalities, was placed in operation this year. All members of the department are required to attend one session of this school weekly for a period of ten weeks. Upon completion of the course, each member is required to take an examination and the standing attained is a matter of record in the department.

AUTO DIVISION

This Division was formed January 1, 1929, and is charged with the recovery of all stolen automobiles. Exchange of descriptions of stolen cars is made with the police departments in all principal cities, resulting in the recovery of many such cars. An enviable record is maintained, many compliments of the splendid work accomplished having been received.

TARGET RANGE

During the past year a central police target range was completed and regular revolver practice is required of all members of the department, monthly. In addition, detectives and officers assigned to motor vehicles are given instruction in the use of riot guns. The manner of handling gas bombs is also explained to members by a target master, assigned to the target range at all times. Good marksmanship by members of the force not only affords better self-protection for officers when compelled to use firearms against fleeing criminals, but also makes for greater safety of the public who happen to be about during such gun fire. Competitive shooting practice has been held and teams formed for matches with other police department teams.

PROPERTY CLERK

The Property Clerk is charged with the safe-keeping of all property recovered and the preservation of evidence for use in the prosecution of cases. Through public auction, he disposes of unclaimed recovered property, the proceeds accruing to the Police Pension Fund.

Following is a report of the cost of repairs to police automobiles and motorcycles during the year of 1929:

In service there are 26 automobiles, including 2 patrol automobiles and 3 Ford trucks, and the cost of repairs for same is \$7,102.32.

In service there are 20 motorcycles, and the cost of repairs for same is \$2,857.10.
